KEESHOO suspension

KEESHOO is a transparent polycarbonate texture: thousands of elements are formed and assembled to compose a scintillating and baroque structure.

Manufactured in our workshops in Marseille these exceptional pieces without limit of size are designed to be transported and installed on site by our team.

Whether it takes the form of a chandelier, a ceiling light or a column at the center of a staircase, KEESHOO offers unique configurations. Regarding the source light : LEDs are integrated into the texture or the light comes from recessed spotlights.
