KOO suspension

KOO is a suspension made up of luminous translucent elements, connected to each other in a plane or curved surface according to the configurations. It is possible to combine several KOO to form a large suspension or illuminate a corridor.

It is also possible to adapt this model to made-to-measure projects: the size, shape and brightness of each element can be re-defined in collaboration with the interior designers, the elements will be created in our workshop in France.

Technical Informations

Dimensions	Long 1m10 x width 0m50 x height 3cm
Weight	7 kg
Packaging	1m20 x 55cm x 10cm
Materials	Translucent Polycarbonate translucide / matte finish white PVC Steel wire
Color	White
Light source	24V Leds Temperature 2700 K° (warm white) Luminosity 6400 lm Consumption 96W Efficiency 70 lm/W IRC > 90
Power supply	110V or 220V Transformer 24V
Fire classification	B s1 d0 (M1) UL 94 - V2
Options	Remote control RGB leds

Made in France

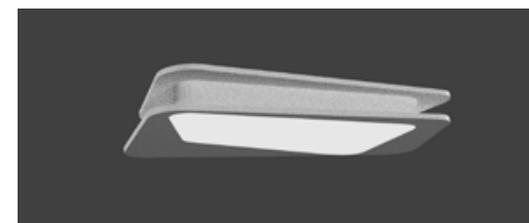

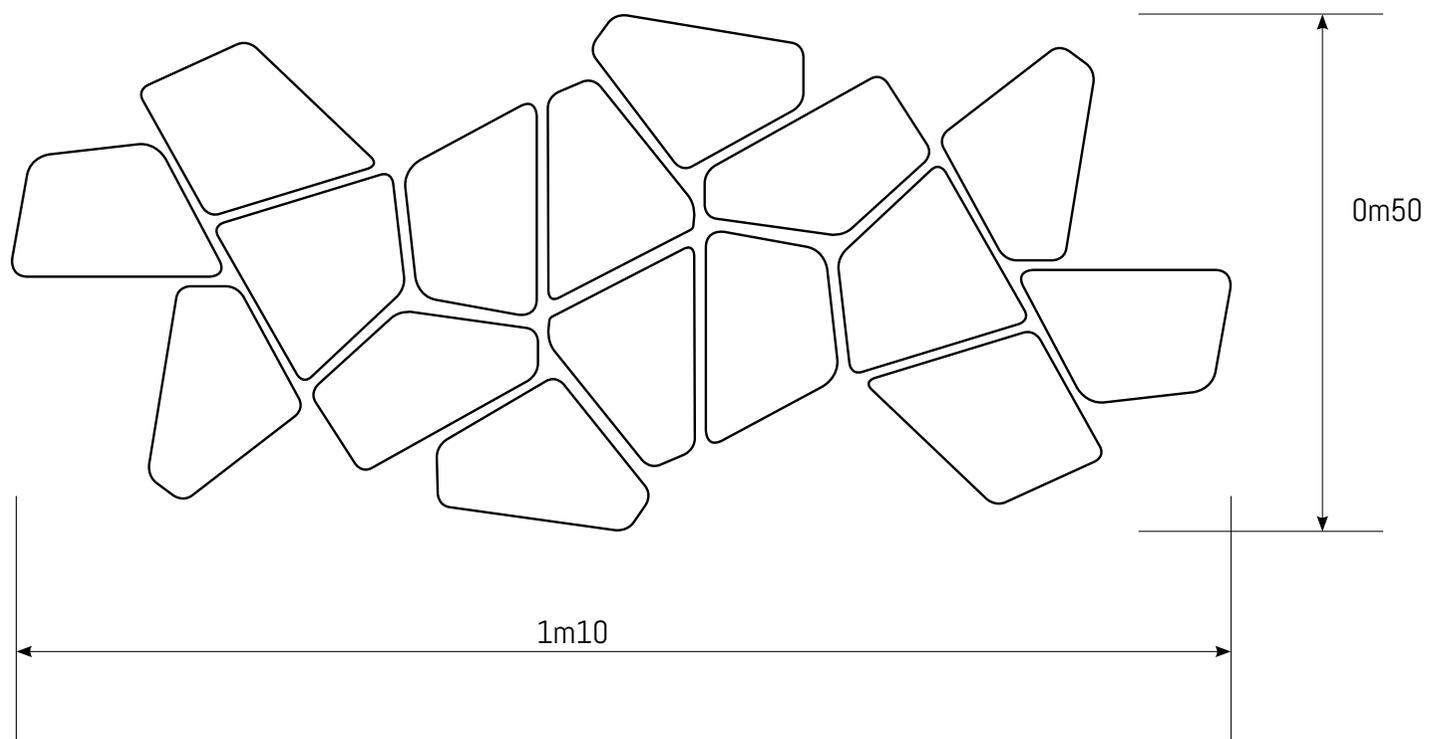

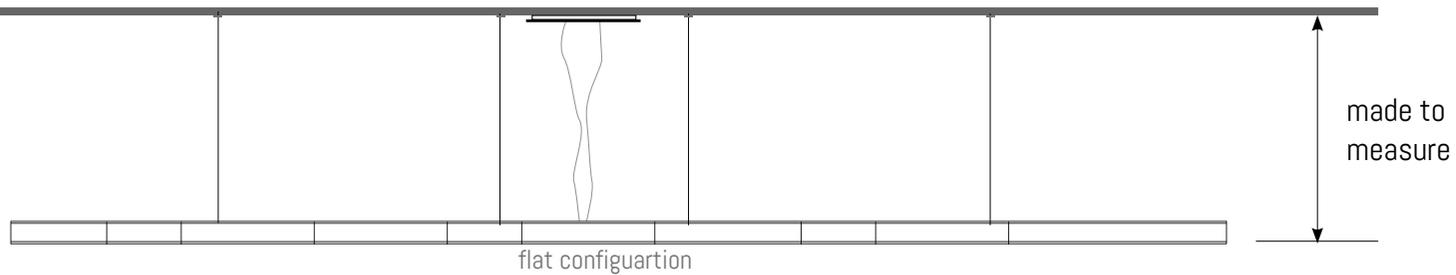

IP20
